AUTOMATE YOUR NON-CRITICAL PURCHASING PROCESSES WITH ARTIFICIAL INTELLIGENCE

MORE SAVINGS AND EFFICIENCY FOR YOUR PURCHASING DEPARTMENT

Reduce your time and costs by using artificial intelligence to automate non-critical purchasing processes

U-Intelligent Buy is a product or service procurement process solution that runs entirely through artificial intelligence and automated technologies

By automating the low-risk, low-value purchasing process, we reduce the time, effort, and operating cost of manual and repetitive activities. The buyer can dedicate efforts to more strategic activities that generate value and results for his company.

60% of S2P processes have the potential to be fully or partially automated, resulting in significant cost savings.

+ FEATURES

100% automatic purchase process

Use of Artificial Intelligence and process automation

Requisition aggregation

Speed and Efficiency

Integrated to **SAP Ariba**

+ BENEFITS

Automate repetitive and manual tasks

Operating costs reduction

Maverick buy reduction

Reduction of errors and failures

Free time for strategic tasks with higher added value

USE ARTIFICIAL INTELLIGENCE TO AUTOMATE THE LOW-VALUE-ADDED PURCHASING PROCESS

+ FLUJO DE PROCESO

2

SELECT SUPPLIERS

Use of AI for supplier
selection

4

OFFER ANALYSIS

Analyze the offers
sent by comparing
historical data

6

AWARD SUPPLIERS

Automate the award process, leading to
an approval process if necessary

1

AGGREGATION OF PURCHASE REQUISITIONS

Analyze approved purchase
requisitions through AI to
aggregate them and increase
bargaining power by optimizing
the purchasing process

3

CREATE AND PUBLISH RFP

Publish RFPs automatically
reducing manual buyer effort

5

CREATE NEGOTIATION ROUNDS

The negotiation rounds process
can be automated by simulating
buyer actions based on data
and behavior recorded in the
system's history

7

CREATE PURCHASE ORDER

Create a purchase order automatically
reducing manual buyer effort.

With the support of SMART MAP
it will be possible to anticipate
divergences in the generation of
the purchase order
